VANDY AHMAD MISRY AR RAZY

Fullstack Software Engineer | Golang, React, Next.js, TypeScript

Banjarnegara, Central Java, Indonesia | +62 851-5664-5724 | vandyahmad2404@gmail.com
GitHub: github.com/vandyahmad24 | Portfolio: arrazyinovasi.com/portofolio

SUMMARY

Fullstack Software Engineer with nearly 7 years of experience building web, mobile, and backend systems for banking, telecommunications, fintech, government, and education. Strong in Golang (Gin, Fiber, gRPC) and React/Next.js with TypeScript, with hands-on experience in NestJS, PostgreSQL, Docker, and CI/CD. Has designed and shipped multi-tenant SaaS platforms, payment integrations, AI-powered applications, and real-time systems from database design to production deployment. Works well with QA, UI/UX, and product teams, and is comfortable working remotely.

SKILLS

- **Languages:** Go (Golang), TypeScript, JavaScript, PHP, Python, Java, Dart, SQL
- **Backend:** Gin, Fiber, gRPC, WebSocket, NestJS, Express, Laravel, Phalcon, REST API design, Microservices, GORM, Prisma, Drizzle ORM
- **Frontend:** React, Next.js, Vue 3, Nuxt 3, Tailwind CSS, Server-Side Rendering (SSR), Astro
- **Mobile:** Flutter, React Native (Expo)
- **Databases:** PostgreSQL, MySQL, Redis, MongoDB, Firestore
- **Cloud and DevOps:** Docker, Docker Compose, GitHub Actions (CI/CD), Ansible, Caddy, AWS S3, Cloudflare, Linux server administration
- **Auth and Security:** JWT, OAuth 2.0 (Google Login), Role-Based Access Control (RBAC), audit trail
- **Testing:** Playwright (E2E), API documentation with Swagger/OpenAPI
- **Integrations:** Payment gateways (QRIS, Midtrans), WhatsApp API, LLM APIs (OpenRouter), PDF generation (Puppeteer)

WORK EXPERIENCE

Staff Fullstack Developer (Golang and React)

PT Aplikanusa Lintasarta | January 2023 - Present

- Build RESTful APIs with Golang (Gin), gRPC for service-to-service communication, and WebSocket for real-time features in a microservices architecture.
- Use goroutines and concurrency patterns to improve throughput and scalability of backend services.
- Develop frontend applications with React, Next.js, and TypeScript, using server-side rendering for better performance and SEO.
- Build reusable UI components and integrate them with backend APIs for a consistent user experience across products.

Founder and Lead Software Engineer

Arrazy Inovasi Teknologi (software house, part-time) | 2024 - Present

- Design, build, and deploy end-to-end systems for clients in education, cooperatives, retail, events, and healthcare distribution, plus in-house SaaS products.
- Own the full lifecycle: requirements, database design, backend and frontend development, CI/CD, deployment, and maintenance.
- Deliver 14 production projects, including a multi-tenant school SaaS, an AI curriculum generator, a cooperative accounting system, and AI-powered CRM tools (see Selected Projects).

Staff Fullstack Developer (Golang and React)

PT Bank Rakyat Indonesia (Persero) Tbk | November 2021 - January 2023

- Developed core banking transaction modules for Foreign Exchange, Current Account, Savings Account, and Overdraft using Golang.
- Built responsive teller interfaces with React, Next.js, and TypeScript on top of complex transaction logic.
- Integrated real-time transaction status with WebSocket and REST APIs so tellers receive live feedback during operations.

Backend Developer (PHP)

CV. Assalam Teknologi | August 2020 - August 2021

- Developed and maintained SIPD (Regional Government Information System) for DKI Jakarta, DI Yogyakarta, and other provinces.
- Built features with Phalcon, Laravel, React, jQuery, and Docker, and kept the system stable, secure, and scalable across regions.

Backend Developer (PHP)

PT Lunaria Annua Teknologi (KoinWorks) | November 2019 - August 2020

- Developed and maintained the back-office admin system of the KoinWorks super app.
- Worked with Laravel, PostgreSQL, and API integrations in a microservices environment.

SELECTED PROJECTS

Lentra - Multi-Tenant School SaaS Platform (lentra.id)

NestJS, Next.js 15, React 19, TypeScript, PostgreSQL, Drizzle ORM, Docker Compose, Caddy, Playwright, GitHub Actions

- Built a SaaS where schools self-register, pay, choose a subdomain, and go live in minutes with a website and admin system.
- Designed schema-per-tenant isolation in PostgreSQL with transaction-scoped search_path so connection pooling cannot leak tenant data.
- Implemented admissions, tuition, attendance (RFID/QR), grading, report cards, automatic per-tenant migrations, on-demand TLS, and E2E tests.

Kurikulum Otomatis - AI Curriculum Document Generator

Next.js 14, TypeScript, Express, Prisma, PostgreSQL, OpenRouter LLM, Puppeteer, WebSocket, QRIS, Docker, GitHub Actions

- Built an AI tool that generates complete teaching documents for grades 1 to 12 and exports them to PDF and Word.
- Designed a restart-safe asynchronous generation pipeline with model rotation, retry, and provider fallback.
- Implemented a credit system with automatic refunds, idempotent QRIS payment callbacks, real-time notifications, and Google login.

Koperasi Dwija Usaha - Multi-Unit Cooperative Information System

Nuxt 3, NestJS, Prisma, PostgreSQL, JWT, RBAC, Docker, Swagger

- Built one platform for three business units (trading, palm oil purchasing, savings and loans) with automatic double-entry journals.
- Implemented tiered loan approvals, installment schedules, trial balance, role-based dashboards, and an audit trail.

ALIQA AI Assistant and Zaherba CRM - AI Customer Service and Operations

Golang (Fiber), GORM, PostgreSQL, Redis, Next.js 15, Nuxt 3, React Native, WhatsApp API, LLM

- Built an AI chatbot on WhatsApp that answers from an editable knowledge base and internal SOPs, with database integration for orders.
- Built a CRM dashboard for chat management, orders, purchasing, and automatic shipping receipt delivery via WhatsApp.

Mitra Infinite - Order, Inventory, and Finance System for Event Organizers

Flutter, Golang (Gin), GORM, PostgreSQL, AWS S3, Web Admin Dashboard

- Built a mobile app and admin dashboard for orders, service packages, warehouse stock, stock opname, and daily cash flow monitoring.

VibeRouter - AI API Router and SaaS Dashboard (viberouter.id)

Next.js, Express, Golang (Fiber), MongoDB, MySQL

- Built a 24/7 AI request router with multi-client API key management, usage tracking, and access control for tools such as Claude Code, Codex, and Cursor.

SIM-Pesantren Al-Muttaqin - Boarding School Management System

Next.js 16, React 19, TypeScript, Prisma, PostgreSQL, React Native (Expo)

- Built operations dashboard, Quran memorization logs, barcode gate permits, cashless canteen with virtual accounts, and a clinic module with RBAC.

Other Projects

- **Hafiz Indonesia Emas Certification Platform** (Vue 3, Golang, MySQL): national registration system with admin verification and CMS.
- **B.Night Run Party** (Astro SSR, payment gateway): marathon registration with quota queue, traffic spike handling, and automatic certificates.
- **Sonar Gorden 4444** (Next.js 16, Drizzle ORM, PostgreSQL): product catalog with full CMS and landing page editor.
- **SMK Sekar Bumi Nusantara**: school website, school management system, and LMS.
- **PT Mito Adhiguna Kencana** (Vue.js): medical equipment e-commerce catalog with advanced filters and SEO.
- **Redcode by United Tractors** (Flutter, NestJS, Next.js): workplace safety app with emergency alerts and real-time notifications.
- **RT Pintar** (React Native, Laravel Nova, MySQL) and **Koperasi Syariah AHM** (Flutter, Laravel Nova, MySQL): community billing and sharia cooperative apps.

EDUCATION

Bachelor of Informatics Engineering

Institut Teknologi Telkom Purwokerto | 2016 - 2021 | GPA 3.10/4.00

LANGUAGES

Indonesian (Native) | English (Intermediate, able to read and work from technical documentation)
